PROJECTS:**ECON602: Senior Research Project**

Lawrence University, Appleton, WI.

- Research Question: Does legalising recreational marijuana have an impact on state-level employment?
- Methodology: Difference-in-Differences model using state and year fixed effects
- How: Utilised event study graphs, regression tables, propensity score matching in RStudio
- Data: Tidied, wrangled, and processed over 300,000 observations across 25 variables.
 - Final Dataset included economic, demographic, geographic controls for all 50 states between the years 2000-2022. These included variables such as GDP, Population, Race, and Region.

GLST100: Final Research Project | Co-Author

Lawrence University, Appleton, WI.

- Thesis: The Nordic Model: A system of minimally applicable success
- Conducted a comparative data analysis of GDP per capita and income inequality across five Nordic nations against the USA, UK, and France.
- Evaluated how privatization and trade liberalization coexist with robust social safety nets to drive national prosperity.
- Formulated a rebuttal to Baumol's Law, arguing that strategic labor allocation and high education levels sustain productivity within welfare services.
